Rental Analysis & Cash Flow

Rent Snapshot

Scenario	Annual Rent	Per Sq Ft	Gross Yield	Net Yield
Conservative (tenant target)	AED 120,000	AED 85	6.2%	4.1%
Most-likely (fair market)	**AED 128,000**	**AED 91**	**6.6%**	**4.5%**
Optimistic (furnished)	AED 138,000	AED 98	7.1%	4.9%

Rent verdict: Fair market rent for E706 is ~**AED 128,000/yr**. Anchor your offer at the DLD index and target **AED 120,000–125,000** unfurnished (low-mid floor = leverage). A softening, supply-heavy 2026 market favours the tenant. Treat any asking price of **AED 150,000+** as overpriced — that reflects the building's larger 1,866–3,138 sqft units, not this 1,404 sqft layout. Furnished adds ~AED 10,000–15,000.

Recommendation & Risk Factors

Investment Recommendation

Signal: BUY | Suggested Offer: Rent: AED 120,000-125,000/yr | Buy: ≤ AED 1,900,000

For a tenant, E706 is a RENT-SMART opportunity: fair rent is ~AED 128,000/yr, so anchor negotiations at the DLD index and target AED 120,000-125,000 unfurnished — a softening, supply-heavy market gives you leverage, and any 150k+ ask (which reflects the building's larger 1,866-3,138 sqft units) is overpriced for this 1,404 sqft layout. For an investor, it is a sound Grade-A buy-and-hold at ≤ AED 1.90M: tax-free ~6.6% gross income, deep tenant demand in Dubai's highest-volume community, and appreciation tailwinds (Hessa St upgrade, 2029 Blue Line Metro). Net yield (~4.5%) is capped by premium service charges, and leveraged cash flow is thin at current rates — so cash or a larger deposit and a 5+ year horizon are key.

Action Items Before Purchase

1. Verify the exact RERA service charge for Tower E (biggest yield variable)
2. Confirm furnished vs unfurnished and cheque count before negotiating rent
3. Check the DLD/RERA rental index calculator for the legal renewal cap
4. Inspect immediate surroundings for active construction / noise near Tower E
5. If buying: stress-test the mortgage at +1% EIBOR and confirm the reserve fund

Risk Factors

Risk Factor	Probability	Impact	Notes
Supply Wave (2026)	High	Medium	JVC top oversupply-watch zone; softens rents and compresses yields toward 6-7%
Service-Charge Drag	High	Medium	~AED 21k/yr (~16.5% of rent) is the single biggest yield killer — verify Tower E figure
Leverage / Rate Risk	Medium	Medium	Cash flow turns negative if rates >5% or rent sits at the 117k floor
Transaction Costs	Medium	Medium	~8-9% round-trip; any sub-3-year hold is risky — buy-to-let, not a flip
Construction Noise	Medium	Low-Med	Newer JVC pockets face 1-2 more years of disruption; inspect nearby plots

incurred.
