TOP PICK

Hills South 3 — Dubai South | Score 72/100 | Best appreciation + yield balance

Side-by-Side Comparison

	Hills South 3	Greenfield 1	Boulevard Heights
Location	Dubai South	Al Warsan 4 / Int'l City Ph2	DLRC / Dubailand
Project size	~147 units (boutique)	~310 units	~541 units (largest)
Studio from	~AED 639K	~AED 620–720K	AED 693K
1-Bed	~AED 1.0–1.15M	~AED 900K	~AED 1.15M
2-Bed	—	~AED 1.3M	~AED 1.6M
Price / sqft	~1,500–1,750	~1,370–1,580	~1,300–1,600
Gross yield	7.0–7.5%	6.1–6.7%	6.5–8.5%
Net yield	~5.0–5.5%	~4.0–4.6%	~4.5–6.0%
Handover	~Q4 2028	Q4 2028–Q1 2029	Q1 2029
5-yr appreciation	+25–40%	+15–30%	Low single digit
Key catalyst	Al Maktoum Airport + Expo City	Blue Line Metro 2029 (3 IC stations)	Blue Line nearby (no in-zone stop)
Payment plan	1%/mo × ~70–75 mo	1%/mo × ~80–85 mo	1%/mo × ~70 mo
Investment Score	72 / 100	68 / 100	64 / 100

Shaded column = top-ranked. All figures AED.

The Verdict on Each

#1

Hills South 3 — Dubai South

72 / 100

Lowest entry (~AED 639K), best net yield, and the strongest infrastructure-led appreciation story — the \$35B Al Maktoum Airport expansion is Dubai's #1 housing-demand driver. Boutique 147-unit building means less internal competition.

Risk: Dubai South is an elevated near-term supply zone; Metro/rail are future-dated.

Best for: patient, appreciation-focused capital with a 5+ year horizon.

#2

Greenfield 1 — Al Warsan 4

68 / 100

Sits in one of Dubai's highest-yield rental corridors with a hard 2029 catalyst — the Blue Line Metro (3 International City stations, RTA projects up to +25% uplift).

Catch: priced ~45–65% above Warsan 4 resale, so yield-on-cost lands below the area's headline rates — you pay premium for metro-driven appreciation.

Best for: clients who will hold to 2029+ and back the metro thesis.

#3

Boulevard Heights — DLRC

64 / 100

Genuinely differentiated — a private pool in nearly every unit — in an affordable, deep-demand mid-market (DLRC yields 7–9.5%).

But: largest project (541 units) handing over (~Q1 2029) right as Dubailand absorbs a record delivery wave; carries the most Samana delivery/quality risk (mixed reviews, ~1yr delays reported).

Best for: income buyers with reserves who can wait out a slow start.

Recommendation

Which one to pick depends on the client's priority:

Client priority	Recommended project
Appreciation / long-term upside	Hills South 3 — Al Maktoum Airport growth corridor
Rental demand + metro catalyst	Greenfield 1 — Blue Line Metro 2029
Yield + lifestyle USP (OK with slow start)	Boulevard Heights — private-pool units, DLRC

Key Considerations & Risks

- All three hand over ~2028–2029 — directly into Dubai's record supply wave; expect 2026–28 rent softness.
- All carry a new-build premium (~45–65% above area resale comps); yield-on-cost is lower than area headline yields.
- Samana is a high-volume mid-market developer — verify the delivery track record and any handover delays on DLD.
- Lock the payment plan, exact unit price/size, and service charge in writing before committing.
- These are 5+ year buy-and-hold plays — not short-term flips (transaction costs ~8–9% round-trip).
