Recommendation & Risk Factors

Investment Recommendation

Signal: BUY | Suggested Offer: Target $\leq$ AED 1,450,000 (ideal AED 1.25-1.35M if a true 763 sqft unit is available)

Sway Residences offers value entry into a Grade-A community (neighborhood 86/100) at a ~10-25% per-sqft discount to adjacent Emaar towers. Income is strong and resilient — ~7.4% gross / ~5.3% net at fair value, rising to ~8.8%/6.3% if secured near AED 1.25M, with >94% occupancy and positive leveraged cash flow. As an end-user-driven community, Dubai Hills offers liquidity, price stability, and a dual buyer pool on exit. Main watch-items: a maturing market (QoQ price growth ~0%) and a heavy 2026 city-wide apartment supply wave — so buy on yield, hold 5+ years, and treat this as buy-and-hold rather than a flip.

Action Items Before Purchase

1. Verify the exact size/price pairing — confirm 763 sqft against the live price list (the 965k headline is for smaller units)
2. Pull DLD sold comps for Sway 1BR to confirm fair value before offering
3. Confirm the current service charge (AED/sqft) and reserve-fund health
4. Model financing at 60% LTV (investor reality) and stress-test at +1% EIBOR
5. Hold 5+ years; do not underwrite this as a short-term flip

Risk Factors

Risk Factor	Probability	Impact	Notes
Apartment Supply Wave 2026	High	Medium	~120k city-wide handovers + ~5,600 DHE pipeline pressures the apartment segment
Price/Size Data Conflict	High	Medium	'From 965k' is for ~450-600 sqft units; verify the 763 sqft price and DLD records
Service-Charge Inflation	Medium	Medium	DHE charges trending up; each +AED 2/sqft cuts ~AED 1,526/yr from NOI
Leverage / Rate Risk	Medium	Medium	DSCR ~1.19 at 80% LTV; thin if EIBOR rises above 5%
Maturing Market	Medium	Low-Med	QoQ price growth ~0%; ~1% Dubai-wide forecast 2026 — capital growth modest near-term
